

# Radiologex

Healthcare Happens Here™

Radiologex® is the **world's first** Medical Interactive Network™ (MIN™), an all-encompassing technological ECOSYSTEM available anytime on the Web or as an APP on any device. Facilitated by means of blockchain technology, Radiologex empowers users with the necessary tools to perform and conduct a myriad of tasks and activities all in one place. Radiologex, or R-DEE® for short, is a revolutionary software platform and digital global network for medical industry professionals and participants alike that is **user-friendly**, **ultra-fast** and **exceedingly secure**.

## A Complex Issue

Technology in the highly fragmented field of healthcare is plagued by a wide spectrum of obstacles that are directly linked to the absence of a modern, standardized technology stack. The industry at large is generally run on **outdated** legacy software applications and **expensive** hardware systems that ultimately fail to address present-day data sharing and security requirements. From the largest hospitals down to the individual person contractor that is affiliated with the medical industry, all medical industry participants are constantly dealing with **insufficient and redundant** applications, inefficient processes and heaps of paperwork, which has been exacerbated by convoluted laws as a result of a **disconnected industry**, as well as the profit-seeking activities of numerous intermediaries that thrive on the current inefficient nature of the healthcare marketplace.

## A Sophisticated Solution

Radiologex provides a unique and highly sophisticated technological solution that addresses current healthcare industry shortcomings with special attention given to the carefully researched issues that medical establishments hold most near and dear, such as: significantly reducing operational costs, greatly increasing network speed, facilitating wide-ranging communication capabilities, significantly enhancing operational transparency, providing an intuitive and easy-to-use technology experience, and promoting marketplace efficiency and connectivity.

The Radiologex MIN features a suite of software applications running on a collaborative, peer-to-peer ultra-secure and decentralized computer network known as Distributed Ledger Technology or simply a **Blockchain**. The network has **7 key applications (modules)** running on top that facilitate and incentivize different types of users to perform their intended functions in healthcare in a manner that is time and cost effective like never before. This is achieved by creating a secure, standardized software network, that brings together different functions such as payments, logistics, marketplaces, data sharing systems, etc. into **one self-sustaining and interoperable ecosystem**. Built as a modern, industrious tech product, the platform leverages best-in-class security and user-experience primitives in its design and development.

# Software Modules

- 1** R-DEE **MESSENGER**

A user-friendly and intuitive communication platform designed to organize and connect 60 million+ global medical professionals. R-DEE Messenger allows users to network, collaborate, share, and transfer data with full strong encryption, security, compliance, and custodial ownership of all transmissions. Groundbreaking connections for the medical community.
- 2** R-DEE **PAY**

R-DEE PAY is secure, easy to use, and demystifies the healthcare sector's complex payment system. An Ultra-Secure Borderless Secure Payments system with powerful tools to transact instantly and settle all types of payments and financial transactions.
- 3** R-DEE **MARKETPLACE**

R-DEE MARKETPLACE is a borderless global marketplace that directly connects buyers and sellers of medical supplies & equipment, with features to track, pay and check the authenticity of purchases. Open 24/7 in the palm of your hands, global, powerful, delivering quicker transactions with integrated R-DEE PAY. More products and more choices, only on Radiologex.
- 4** R-DEE **SERVICE-ON-DEMAND**

R-DEE SERVICE-ON-DEMAND provides a convenient and inexpensive means to access service and support, for any and all medical modalities as quickly as possible. It features instant and global P2P service requests, connecting end-users with qualified service providers worldwide, allowing anyone to access service talent and knowhow, without borders and no "middle-man". R-DEE Pay and smart app integration means the service orders are proficient, catalogued and settled instantly. Save time, save money, only with R-DEE.
- 5** R-DEE **PACS**

R-DEE PACS (Picture Archiving and Communication System (PACS) provides medical professionals with a one-stop medical image archiving and processing system. It offers a responsive environment with fluid workflow and user-friendly settings. Whether on web or handheld devices, R-DEE PACS is the most powerful Medical Imaging software available, with advanced voice dictation and auto-dictation with inversions, measurements, full reports, processing, transfers and secure LIMITLESS fully protected file storage. Medical Imaging. Simplified.
- 6** R-DEE **CIS/RIS**

R-DEE CIS/RIS provides a Radiology Information System (RIS) and Clinical Information System (CIS) complete with management tools for imaging departments including patient referral, doctor-to-doctor, and patient scheduling tools. Scalable and customizable, built to be used by clinicians of any size and order. Empowering healthcare efficiency and alignment.
- 7** R-DEE **CONTENT & APPS**

R-DEE CONTENT & APPS is an Integrated Content Delivery Network, an all-in-one global centralized network which provides fast delivery of Medical content with unlimited bandwidth and gamut of selections of high-quality content from peer-to-peer, business, enterprise and OEM trusted partners. Medical only trusted content, from trusted sources, only on the Radiologex Network. Delivering high quality instantly streaming Video/Voice (podcast) and APPS (software) from P2P and Commercial/OEMS. Connecting medical discovery and fostering innovation, only on R-DEE.

The R-DEE platform was conceived, designed, and built as an **all-inclusive** and **one-stop-shop** ecosystem to realign the global medical industry in a manner that promotes **maximum market efficiency, organization** and **connectivity**. In addition, Radiologex is USA based, patent pending, has the strongest suited HIPAA compliance available today while also achieving ONC certification by the US Department of Human and Health and Services (HHS), proving that Radiologex is built for the present and tomorrow. The Radiologex mission is to become the new standard for medical industry participants across the globe to connect, communicate, transact, distribute/share content, and perform services in a manner that is low cost, super-fast, highly efficient, ultra-secure, user-friendly and convenient.
