Costs and Considerations of Certified Health IT				
Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>	Contractual Considerations <i>Considerations of a contractual nature (including developer policies and other business practices) that a user may encounter in the implementation or use of the capability -OR- in the connection with the data generated in the course of using the capability</i>	Technical or Practical Considerations <i>Considerations of a technical or practical nature that a user may encounter that could prevent or impair the successful implementation, configuration, maintenance, support or use of the capability -OR- prevent or limit the use, exchange or portability of any data generated in the course of using the capability</i>
170.315(d)(2)(3)(5)(7)(8)(9)	This functionality: enables access to system only by authorized individuals; recording of actions related to electronic health information; ensures end-user device encryption and integrity via a standard hashing algorithm.	Users here largely use a freemium model, but a tier 1 and tier 2 subscriptions exists based on scale and quantity of data bandwidth needed. Furthermore, each user will have a unique RDEE user ID that is verified on our blockchain to determine each every use and login info. Most users will use the freemium tier which has no setup fees. User authentication is licensed through and uses a trusona engine for 2fa and 3FA authentication including the use of biometrics.	No contractual considerations.	No technical or practical considerations.
170.315 (e)(2)(3)	The Secure Messaging functionality supports the secure transmission of radiographic related images and documents.	We use KYC through onfido and use advanced 2fa/3fa user authentication utilizing trusona technology. A tier 1 and tier 2 subscriptions exists based on scale and quantity of data bandwidth needed, along with an RDEE Enterprise level tier for unlimited storage capacity. Furthermore, each user will have a unique RDEE user ID that is verified on our blockchain to determine each every use and login info. Most users will use the freemium tier which has no setup fees.	No contractual considerations.	No technical or practical considerations.
