Healthcare Happens Here™

# Your Health. Your Data.

Introducing a revolutionary, highly secure application that empowers users with complete custodianship of their health records. With our app, you can share your entire health history anywhere across the globe, anytime, and with remarkable ease.

Features an intuitive, eye-pleasing UI designed for ease of use and accessibility by all patients globally.

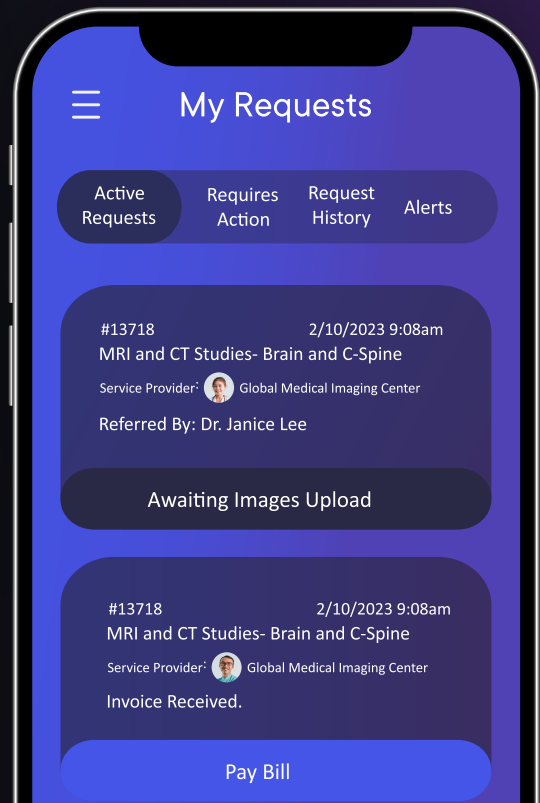

Improves global healthcare access by boosting provider efficiency, bridging tech gaps, and providing essential services affordably.

The only PHR with built-in user identity-proofing and access tracking, utilizing R-DEE blockchain and HD-ID technology.

Our PHR monetization feature allows safe, anonymous health data monetization with network partners, aiding healthcare progress while providing financial rewards.

The only PHR built on Web3 tech.

# Meet R-DEE Go

Take your Health with you, wherever you go.

Advanced cryptographic encryption technology for ultimate security.

Integrated streaming, communication, bill pay, health trackers, and more.

In-app KYC, Biometric engine, and real-time verification.

Unique, immutable Healthcare Digital ID (HD-IDs) can be used globally for better and faster access to healthcare.

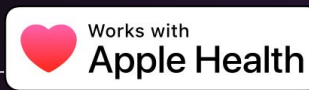

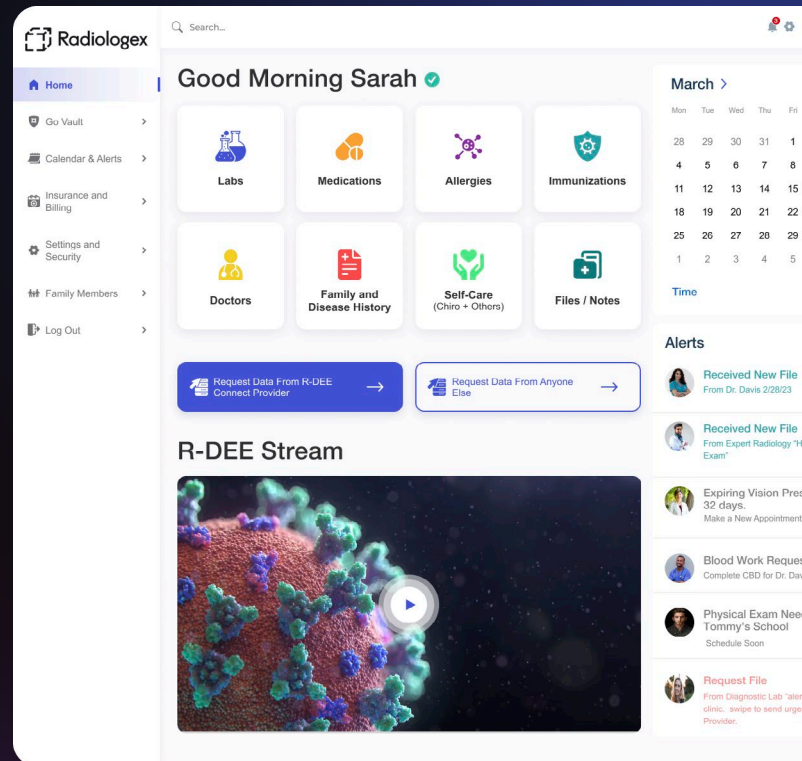

Distributed data network storage eliminates single points of failure, allowing for the most robust data backup and redundancy.

Access and tracking of one's comprehensive health records.

Push-button, automated ability to update, add, or share data and records instantly, reducing workload for all providers.

Blockchain-based audit trails allow for complete tracking of data access, with advanced security and data immutability.

Easy to download, register in minutes, free, and available free for all global users.
